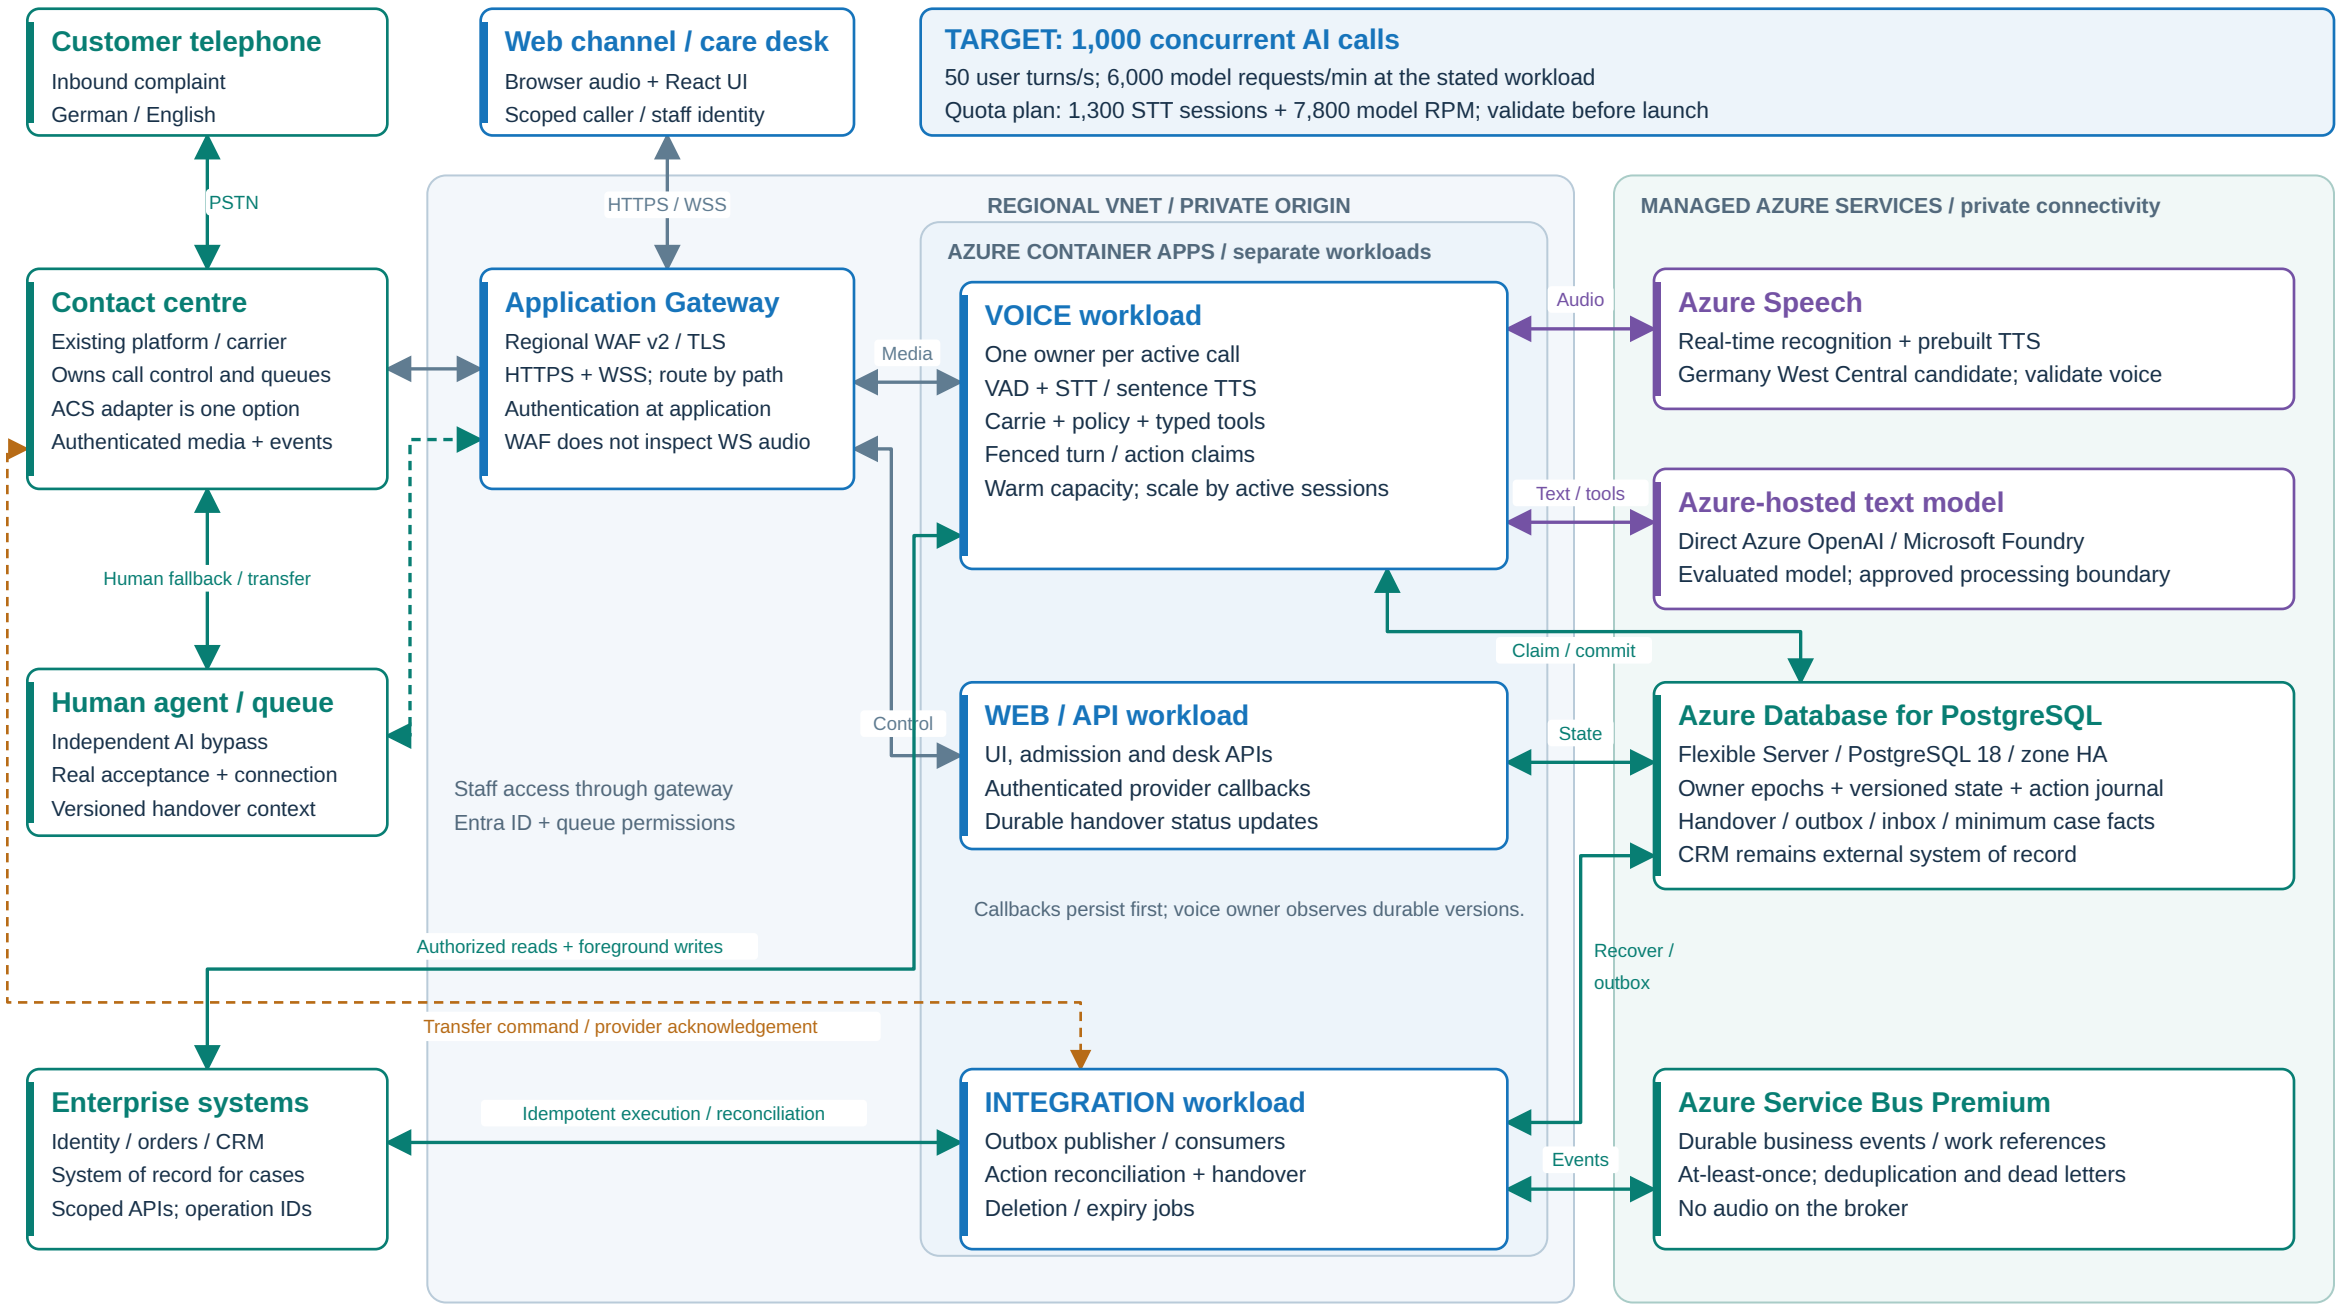
Carrie | Azure scale-up architecture

PROPOSED TARGET / 5 NOV 2026 / Up to 1,000 concurrent AI calls; capacity approval and load tests required



IDENTITY AND SECURITY

Entra ID / managed identity / Key Vault
Private connectivity + DNS / scoped enterprise access
Applies to all workloads and data services

OPERATIONS

OpenTelemetry -> Azure Monitor / Application Insights
Session, turn, action and handover correlation
Content logging off; latency / quota / outcome alerts

DELIVERY

Federated CI -> ACR -> controlled revisions
One migration job; no production demo seeding
Drain existing calls before retiring a revision

Optional after measurement: Managed Redis for ephemeral context/notifications; AI Search + Blob for approved knowledge.

Target: 1,000 concurrent AI calls. Validate quotas, full-load latency and zone-loss recovery. One region + independent human bypass.

Arrows: request/response or streaming exchange; lower band: shared controls. | Details and sources: azure-architecture-proposal.md
